SUMMARY

MERN Stack / Junior Full-Stack Developer and final-year BS Computer Science student with about six months of project-based experience building and deploying web apps in React, TypeScript, JavaScript and Tailwind CSS, with Chart.js visualizations, GSAP and Anime.js animation, accessible UI and GitHub Pages deployment. Open to Junior Full-Stack, MERN and Frontend roles.

EXPERIENCE

Web Development Intern · HerDev

Aug 2, 2026 - Sep 15, 2026 | Remote

- Built and refined web app features in a remote team, following coding standards and mentor feedback to deliver on schedule.

PROJECTS

Study Station - Learning Resource Directory · React · TypeScript · Tailwind CSS · GSAP

[Live Demo](#) | [GitHub](#)

- Built a React 19 and TypeScript single-page app (Vite, React Router 7) organizing 10 courses, 65 resources, 4 tutorials and 82 YouTube channels from typed data files.
- Built weighted, accent-insensitive in-browser search with a keyboard-driven overlay and URL-synced category filters.
- Added GSAP and Framer Motion animations, an ARIA-labelled search dialog and a validated Formspree contact form; GitHub Actions lints, builds and deploys to GitHub Pages.

StudentHub - Academic Analytics Dashboard · React · Vite · Tailwind CSS · Chart.js

[Live Demo](#) | [GitHub](#)

- Built a React 19 dashboard showing each student's attendance, grades, quizzes, assignments and presentations with Chart.js line, doughnut, bar and radar charts.
- Implemented student add, edit, delete, search and filter flows with form validation, React Context, custom hooks and localStorage persistence with a seed-data fallback.
- Computed GPA, attendance and weighted performance scores in the browser; deployed via GitHub Actions to GitHub Pages.

Ludo Royale - Browser Board Game · HTML5 · CSS3 · JavaScript · Anime.js

[Live Demo](#) | [GitHub](#)

- Built a 2-4 player Ludo game in vanilla JavaScript with a rules engine (captures, safe squares, blockades, exact-roll finishing) and heuristic AI opponents.
- Created a CSS 3D dice with Anime.js, fair Web Crypto rolls and sound effects synthesized at runtime with the Web Audio API.
- Organized 11 scripts into rules, UI and support layers with an event bus; added autosave and resume and local statistics.

Wildflour BakeHouse - Bakery Landing Page · HTML5 · Tailwind CSS · Custom CSS

[Live Demo](#) | [GitHub](#)

- Built a responsive single-page bakery site with 11 sections using Tailwind CSS (CDN) and a custom stylesheet with CSS variables, Grid, Flexbox and clamp().
- Implemented the mobile menu with a hidden checkbox and CSS sibling selector, with no application JavaScript.
- Applied semantic landmarks, aria-labels, image alt text, focus-visible styles and a reduced-motion rule.

Selected projects shown. More projects on [GitHub](#) and [Portfolio](#)

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, C++, Python

Frontend: React.js, HTML5, CSS3, Tailwind CSS, Bootstrap, Chart.js, GSAP, Framer Motion, Anime.js

Backend & Databases: Node.js, Express.js, MongoDB, REST APIs

Tools: Git, GitHub, GitHub Actions, GitHub Pages, Vite, Figma

UI/UX: Figma, Responsive Design, Accessibility (ARIA, keyboard navigation)

EDUCATION

BS Computer Science · University of Swabi

Currently Enrolled

Final Year

GPA: 3.50 | CGPA: 3.43
